Horsburgh & Scott Receives Award from Gleason for 100 Years of Customer Loyalty

Gleason celebrates its 150 year anniversary by recognizing loyal long-term customers.

Cleveland, OH: March 1, 2016 – Horsburgh & Scott received the “Century Cup” award from Gleason Corporation for being a loyal customer of the company’s gear manufacturing equipment for more than 100 years. Horsburgh & Scott has grown with Gleason from using their gear production equipment a century ago, to the new advanced, high-tech hobbers and gashers and finish grinders with sophisticated technology that are in their manufacturing facility today.

With Gleason having more than 9,000 customers worldwide, it is a rare honor to receive the Century Cup for such a long partnership; only a small number of customers have been given this award. Both companies share similar backgrounds with over 100 years of innovation in the gearing business and keeping a family owned atmosphere regardless of growth, time and industry changes. Horsburgh & Scott was founded by Frank Horsburgh in the 1800s and today Chris Horsburgh continues the 4th generation of Horsburgh management by remaining with the company. Jim Gleason who is great grandson of Gleason’s founder, also remains with the company as chairman of the board.

“Gleason Corporation has been an important key to our innovation and success in the gearing industry for many years, and we are honored to receive an award for our loyalty in this long term partnership with Gleason,” said Pradeep Saha, CEO of Horsburgh & Scott. “We offer gearing equipment and expertise to support the entire gear manufacturing process, and are very happy to have provided Horsburgh & Scott with technologically advanced equipment with many new innovations throughout the years and to be part of their high quality standards,” said John J. Perrotti, President and CEO of Gleason.
